THE INDIVIDUAL DELINQUENT

A TEXT-BOOK

OF

DIAGNOSIS AND PROGNOSIS FOR ALL
CONCERNED IN UNDERSTANDING
OFFENDERS

BY

WILLIAM HEALY, A.B., M.D.

DIRECTOR OF THE PSYCHOPATHIC INSTITUTE, JUVENILE COURT, CHICAGO
ASSOCIATE PROFESSOR MENTAL AND NERVOUS DISEASES, CHICAGO POLYCLINIC

THIS volume is the result of five years' study and investigation by the Juvenile Psychopathic Institute of Chicago. The part played by heredity, disease, mental abnormality and environment in the production of criminals is clearly shown, and the best method of study and diagnosis indicated. It is the first text-book on a vitally important subject.

What the Reviewers say of The Individual Delinquent:

This remarkable work is perhaps the first great expression of the new epoch upon which criminology is now entering. It is also a culmination.—*Harvard Law Review*.

It is hoped that the book will be widely read and freely consulted; it will not fail to be a most valuable guide, philosopher and friend to both the practical worker and to the investigator of detail.—*American Political Science Review*.

It is a book with which everyone who has to deal with offenders should be familiar. It has a message for teachers, religious leaders and parents no less than for the judge, the court officer and the institutional authority.—*Yale Law Journal*.

It is certainly one of the most significant books of the last decade.—*Boston Medical Journal*.

I wish that some public benefactor could make a gift of your book to every judge, every prosecuting attorney, every probation officer, every educator, every clergyman and every family physician in this country.—*John H. Wigmore, Dean of the Law School, Northwestern University, Chicago, Ill.*

862 pages.

CRIMINAL SCIENCE MONOGRAPHS

PUBLISHED UNDER THE AUSPICES OF THE
AMERICAN INSTITUTE OF CRIMINAL LAW AND CRIMINOLOGY

PATHOLOGICAL LYING, ACCUSATION, AND SWINDLING

A STUDY IN FORENSIC PSYCHOLOGY

By WILLIAM HEALY, M.D., A.B., AND
MARY TENNEY HEALY

THE authors have studied thoroughly practically the entire literature on the subject, almost none of which is in English, in addition to the long and thorough case studies made by the Juvenile Psychopathic Institute of Chicago. The result is a work of great value for all who have to deal not only with crime, but with the vagaries of the juvenile mind; a book of practical service for lawyers, doctors, parents, teachers and social workers.

STUDIES IN FORENSIC PSYCHIATRY

By BERNARD GLUECK, M.D.

THIS volume presents the results of a long period of investigation in the criminal department of the Government Hospital for the Insane. It is aimed to present a series of well-rounded-out case histories of criminal types as studied from the psychopathologists' view-point. No attempt is made at hard and fast formulations, but it is felt that this clinical material emphasizes sufficiently the necessity of the psychopathological mode of approach to the problem of criminology. *\$2.50 net.*

THE UNMARRIED MOTHER

A STUDY OF FIVE HUNDRED CASES

By PERCY GAMBLE KAMMERER

WITH AN INTRODUCTION BY WILLIAM HEALY, M.D.

THE question of the unmarried mother and her child is one of the most important social problems of the present day. It is in the belief that enlightened public opinion may see fit to modify the community attitude towards the unmarried mother and her child that Mr. Kammerer has prepared his study of the situation—founded on an analysis of over five hundred cases. The statistics presented are taken from official reports not only in America, but in foreign countries as well. They show only too plainly the futility of the present method of treating such cases, and the necessity of a different viewpoint from the average if the social evil is to be remedied. *\$3.00 net.*
